

BASEMENT FINISH PERMIT GUIDELINES

REQUIRED INFORMATION FOR PERMIT APPLICATION

The following information should be submitted to the City of Shawnee to obtain a permit to construct a deck: Building permits may be applied for in person at Shawnee City Hall or online through citizenserve.com/shawnee.

1. Submit a completed Residential Permit Application, including applicant signature (see attached).
2. Submit electronic set of floor plans, showing the areas of your basement to be remodeled and those areas which will remain unchanged. Plans must show relevant features, such as doors, windows, walls, stairs, and the use of each room (ie. bedroom, den, etc.). Any structural changes should be shown in detail. Please show the location of the furnace and hot water heater, and any provisions for providing combustion air to space. Removal of any structural support column or bearing wall greater than 6' must be done based on a Kansas registered engineer's design.
3. A business license is required for any contractor doing work in the City of Shawnee (contact Mary Crissman at 913.742.6247 or visit www.cityofshawnee.org). In addition, any contractor must have a valid Class A, B, or C Johnson County Contractors License (contact them at 913.715.2233 or access information from their website at www.jocogov.org).
4. A building permit fee (fee schedule attached) based on the project valuation. Cash, credit or Checks made payable to the "City of Shawnee" are accepted.

MISCELLANEOUS INFORMATION AND RESTRICTIONS

The 2018 International Residential Code is the adopted construction code applicable to basement remodeling in single-family residences. Additional information about code requirements are available in our **Basement Finish and Remodel Code Guidelines** handout.

Upgrading Smoke Detectors and Carbon Monoxide Detectors

Finishing your basement triggers a requirement to upgrade the smoke detectors throughout your home, and to provide carbon monoxide detectors outside of all sleeping areas. These special requirements are in the building code because of the importance of smoke/carbon monoxide detectors and the lives that they save every year.

Smoke detectors as required by section R314.2.2 Alterations, Repairs, and Additions, are required to be provided in each sleeping area, outside of each sleeping area, and on each story of the dwelling. Smoke detectors are required to receive their primary power from the house wiring or battery powered. The smoke detectors must be interconnected so that the activation of one detector will activate all of the other smoke detectors.

Carbon Monoxide detectors as required by section R315.2.2 Alterations, Repairs, and Additions, are required to be installed outside of all sleeping areas. Carbon monoxide detectors are required to receive their primary power from the house wiring or battery powered.

Please contact the Building Codes division at 913.742.6010, should you need any reasonable accommodation to assist in making permit application.

Residential Building Permit Application - Other than New Residential Structures
